EDUCATION

- **Hon. B.Sc., Computer Science, AI/ML Stream, Minor in Statistics (Co-Op)** Sep 2022 – Apr 2026
Carleton University Ottawa, ON
 - CGPA: 11.6/12 (A+, 4.0/4.0) | Dean's Honour List (2022-2025) | Entrance Scholarship: \$16,000
- **B.Sc., Biomedical Science, French Stream** Sep 2021 – Apr 2022
University of Ottawa Ottawa, ON
 - Dean's Honour List (2021-2022) | GPA: 9.2/10 | Entrance Scholarship: \$5,000

PROFESSIONAL EXPERIENCE

- **Solutions Engineer Intern (Full-Time)** May 2026 – Present
CENGN Kanata, ON
 - Deploying and configuring bare-metal, virtualized, and containerized test-bed environments within CENGN's hybrid cloud Living Lab to support client validation and commercialization projects
 - Translating client technical requirements into infrastructure specifications and automation workflows, collaborating with the Solutions Engineering team to accelerate testing, demonstration, and adoption of emerging networking and cloud technologies
- **Data Scientist (Contract Part-Time)** Sep 2025 – Apr 2026
Ericsson Kanata, ON
 - Worked as part of a team to develop an AI-powered chatbot for analytical queries, integrating multiple data sources and testing with AWS-hosted LLM models, improving query resolution efficiency for internal technical teams
 - Conducted data analysis on system-level issues impacting radio performance, enabling proactive fault prediction and reducing incident recurrence; collaborated with escalation task forces to decrease critical downtime by 17%
- **Network and Product Data Analyst (CO-OP Full-Time)** May 2024 – Aug 2025
Ericsson Kanata, ON
 - Queried large internal databases using SQL and generated weekly analytical reports with Python (Pandas, NumPy), improving stakeholder decision-making speed and eliminating repetitive manual tasks
 - Translated complex data from varying sources into actionable recommendations for stakeholders by developing interactive dashboards and automating data analysis pipelines (Matplotlib, Seaborn), cutting manual effort by 40%

TEACHING ASSISTANCE EXPERIENCE

- **Teaching Assistant – Database Management Systems (3rd Year)** Sep 2025 – Apr 2026
Carleton University, School of Computer Science Ottawa, ON
 - Guiding students in advanced database concepts including SQL optimization, transaction management, normalization theory, and NoSQL systems; providing comprehensive feedback on database design projects
- **Teaching Assistant – Software Engineering in C++ (2nd Year)** Jan 2024 – Apr 2024
Carleton University, School of Computer Science Ottawa, ON
 - Guided students in object-oriented programming principles (classes, inheritance, polymorphism, design patterns); conducted weekly office hours offering support on C++ assignments and helping students build robust, modular software systems
- **Teaching Assistant – Systems-Level Programming in C (2nd Year)** Sep 2023 – Dec 2023
Carleton University, School of Computer Science Ottawa, ON
 - Assisted students with systems programming concepts including multi-threading, multi-processing, dynamic memory allocation, and inter-process communication; hosted office hours for debugging support and conceptual clarification

RESEARCH EXPERIENCE

- **Honours Thesis: Workflow Recognition in Ophthalmological Surgeries with DL** Sep 2025 – Apr 2026
Carleton University School of Computer Science & Department of Data Science Ottawa, ON
 - Conducting literature review on surgical workflow analysis using deep learning, focusing on time-series architectures (TCNs, LSTMs, Transformers) for automated phase classification in ophthalmological surgeries
 - Implementing and evaluating deep learning models for per-frame phase recognition and segmentation of cataract surgery videos to enable phase-specific workflow analysis and performance feedback for ophthalmology residents

HONOURS, AWARDS & CERTIFICATIONS

- **Top 3 Finish – Hack the Hills 2024**
Major League Hacking (MLH), University of Ottawa
 - Secured top 3 placement out of 36+ teams in 36-hour hackathon developing voice-activated AI calendar assistant as a chrome web extension
- **DeepLearning.AI Certifications (11 courses completed)**
Coursera
 - Neural Networks & Deep Learning, CNNs in TensorFlow, AI for Medicine (Treatment/Diagnosis/Prognosis), Machine Learning Specialization, Advanced Learning Algorithms, Supervised/Unsupervised Learning

PROJECTS

- **AI Mock Interview Practice Platform** Jul 2025
React, TypeScript, Node.js, Express, PostgreSQL, Gemini AI, OAuth 
 - Developed full-stack AI-powered platform featuring resume-specific personalized mock interviews, real-time feedback generation, and progress tracking; implemented Gmail OAuth authentication, file upload for resume parsing, and dynamic form handling
 - Built scalable frontend architecture using Vite, Tailwind CSS, React Router, and Radix UI, delivering intuitive dashboard with real-time session creation and progress visualization
- **Voice-Activated AI Calendar Assistant – Chrome Extension (Top 3/36+ Teams)** Sep 2024
OpenAI GPT-4o, React, Node.js, Express, PostgreSQL, Chrome Extension API 
 - Collaborated in team of 4 to build voice-activated Chrome extension that tracks cloud-based calendars using natural language commands; integrated OpenAI API for voice recognition with React frontend and Node.js/PostgreSQL backend
 - Secured Top 3 finish at Major League Hacking’s Hack the Hills by delivering fully functional prototype within 36 hours
- **Local Pharmacy Website – Healthcare Scheduling Platform**
Cloudflare, Supabase, PostgreSQL, Resend, Brevo
 - Architected and deployed a highly scalable, secure web application using a modern serverless stack to support specialized healthcare scheduling; engineered an edge-network layer with Cloudflare for authoritative DNS routing, custom WAF policies, and global asset caching to ensure low-latency performance and robust DDoS mitigation
 - Built the core appointment booking engine on Supabase, leveraging managed PostgreSQL and row-level security (RLS) to handle concurrent scheduling states with strict data isolation; orchestrated event-driven transactional communications for booking confirmations via the Resend and Brevo APIs, decoupling high-deliverability notifications from frontend state for a resilient, high-availability architecture

TECHNICAL SKILLS

- **Programming Languages:** Python, Java, C, C++, C#, JavaScript, SQL, R, SAS, HTML, CSS
- **Machine Learning & AI:** TensorFlow, PyTorch, scikit-learn, NumPy, Pandas
- **Web Development:** React, TypeScript, Node.js, Express.js, Vite, Tailwind CSS
- **Data & Databases:** PostgreSQL, Matplotlib, Seaborn, Plotly, SQL Server, Database Design
- **Tools:** Git, Linux, Docker, Kubernetes, Statistical Analysis, Time Series Analysis

ADDITIONAL INFORMATION

Languages: French (Native), English (Native), Arabic (Native)
Interests: Deep Learning, Computer Vision, Medical AI, Natural Language Processing, Time-Series Analysis, Surgical Workflow Analysis, Applied Machine Learning in Healthcare
